final STRATUM

Summary:

Description: Opened: when L9214 was collapsed with the material beneath W9712.

Definition/Limits: defined by the material beneath W9085 to the North, by W9180 and the uppermost courses of the most northerly extension of W9408 to the East, by the Southern limit of W9212 above L9538 to the South, and by the material beneath W9510 to the West.

Matrix: mudbricks

Reason for Closing: came down onto level of lowest level of W9408, of which L9538 is really the upper courses.

Relationship to Other Elements: W9212 and W9180 are set into W9408 and cut it and therefore cut L9538, because L9538 is really part of L9408. L9538 extends into the material beneath W9085, as evidenced by mudbricks in section below W9085. L9538 reaches the material beneath W9510. L9538 is part of the matrix of W9408 and these covers a portion of it and is part of it simultaneously.
