Summary

Opened: Came down on floor [F9656]; opened [L9660] as fill below floor and floor/makeup

Limits (N) Bounded by the N bank of A132

(S) Bounded by [L9165]

(E) Bounded by the E bank of A132

(W) Bounded by material below [W9051]

Closed: Came down on floor [F9660]; opened [L9673] as fill below floor

Matrix: Floor/makeup of [F9656] consisted of ca. 5 cm of crushed kurkar and soft, gray ash. Below that, brown, more crumbly soil, including mudbrick debris, lots of pottery, bones, and ash. Soil more densely packed to W.

Relations: [L9660] covers and seals [L9673]. [L9656] covers and seals [L9660]. To the N, [L9660] reaches the material at the bank line between A132 and A133, but since A133 has not yet been excavated here, we cannot yet determine their relation. To the S, material of [L9660] may be identical to that of [L9165]. [L9165] is described as a "fill partly above floor... consisting of several superimposed floors." To the E, [L9660] reaches the material in the 1989 E bank of A132. In 1989, the E bank of A132 was cut back .5 m because of heavy erosion, without being excavated stratigraphically. Therefore, there are no loci that directly relate to [L9660]. To the W, [W9051] floats above [L9660]. To the W, [W905] floats above [L9660]. [F9656] continues into the pedestal below [W9051].

Photo #(3) 70382

Additional Observations/Value: Although [F9660] was fragmentary, it spread across entire locus, and is part of a series of sealed floors.
