Unit	Phase	Stage	Stratum	PoM
------	-------	-------	---------	-----

Summary

Opened: To investigate foundations of W9051 and W9096.

Limits (N) Bounded by L9666

(S) Bounded by balk with A132

(E) Bounded by W9096, and fill below L9095 and W9684.

(W) Bounded by W9051 and fill below.

Closed: Closed level with L9666, when L9665 came down on top of W9684. closed into L9692

Matrix: Dark brown, compact mud brick debris similar to L9666, L9687, L9692, L9693, L9694, L9639, L9638 and L9648. This is mud brick debris which stretches west of W9051 and north of W9278.

Relations: L9665 is covered by L9638. It is a continuation of L9666 and L9638, and continues below in L9692. L9665 is cut by W9051, and by the base of W9096. It appears to be continuous with the fill below W9096 and the fill below L9095. L9665 ends at the base of what is apparently the foundation course for W9051. L9665 reaches the top of the upper course of W9684 and also covers L9684.

Additional Observations/Value: Mudbrick fill cut by W9051 and W9096.
