Summary

Opened: In excavating pit [L9622], came down on [F9623]; [L9677] opened as continuation of pit

- Limits (N) Bounded by [W9626]
- (S) Bounded by [L9661]
- (E) Bounded by E bank of AI32
- (W) Bounded by [L9661]

Closed: Came down on [F9661] and mudbrick wall [W9704]; opened [L9703] as floor make-up of [F9661] and fill below

Matrix: Grayish, sandy soil, with lots of fist-to double-fist sized field stones, and moderate amounts of bones and pottery

Relations: [L9622] covers, but does not seal, [L9677]. [L9677] covers, but does not seal, [L9703]. To the N, the material of [L9677] reaches [W9626]. The part of [F9661] that underlies [L9677] is cut by [W9626]. Since [L9677] narrows as the pit reaches its bottom, the material of [L9677] floats above [W9704]. To the S & W, [L9677] cuts the fill of [L9661], but also floats above [F9661] for the reason given above. To the E, [L9677] reaches the E bank of AI32.

[L9677] is the final locus in a series of loci constituting a single pit, beginning with [L9100], [L9130], [L9151], [L9165], and [L9207] (1987 season); [L9622] and [L9677] (1991 season).

Photo #(3) 70563; #(4) 70564; #(5) 70565

Additional Observations/Value: This is the final locus in a series of loci constituting a single pit.
