Unit	Phase	Stage	Stratum	PoM
------	-------	-------	---------	-----

Summary

Opened: To excavate foundation material below W9051

Limits (N) L9726
 (S) L9612
 (E) L9692
 (W) L9639, L9694 and L9025

Closed: Came down on layer of red-brick debris and W9729.
 Split into L9731 and L9732 on either side of W9729.

Matrix: Light grey soil. Similar to L9619 to the west and L9723 to the east.

Relations: L9716 cuts L9726 to the N, L9639 and L9694 to the W, and cuts and partially covers L9731 and L9732 below. All these are red-brick debris loci. L9716 is a continuation west of L9723 and east of L9619. L9716 partially covers the western extension of W9729. It is uncertain whether L9716 is foundation material laid down for W9051 or a robber trench cutting the top of W9729, and subsequently cut by W9051. However, if L9716 is an RT, it runs perpendicular to the wall it must be robbery which is unlikely. W9051 covers, seals and floats above L9716. L9716 covers westernmost top of W9729. L9716 continues to the S. as L9612 in A132, a red-brick debris locus.

Additional Observations/Value: Sealed FT or RT below W9051. Probably high value.

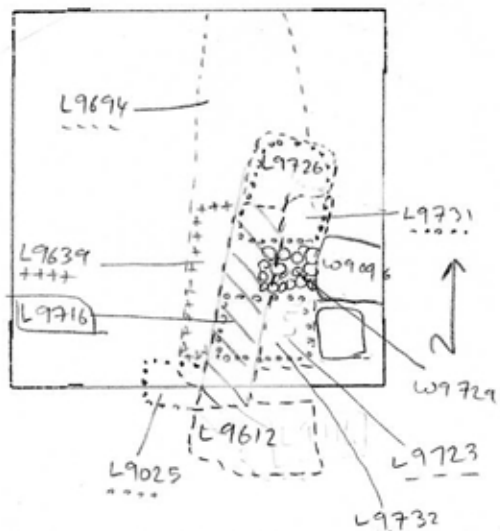

Locus Basket List
