Summary

Opened: When fallen mudbrick material of [L9679] above changed to an ashy grey matrix in SW corner of [L9679] at same level as exposure of [W9066].

Limits (N)

- Bounded on the N by [L9725].
 (S) Bounded on the S by the southern limit of SQ AK33
 (E) Bounded on the E by [L9721].
 (W) Bounded on the W by unexcavated material below [W9147].

Closed: Not closed - end of season.

Matrix: Ashy grey material with many bones and sherds.

Relations:

[L9720] is covered ^{but not squelched} by [L9679]. [L9720] cuts [L9725], [L9721], and may cut the SW corner of [W9066] presently exposed. [L9720] may possibly be the continuation of pit [L9540] in AK32, but this is dubious because the description of the matrix of [L9540] as brown differs from the matrix of [L9720] at the time of [L9720]'s excavation.

8/02 EB-S probably continuation of RT AK32. L9540, L9532. While the matrix differs, the alignment & elevation are correct.

Additional Observations/Value:

little? value. Iron Age pit covered by fallen mudbrick material

(?)
