Summary

Opened: Came down on W9066 in L9679 separating L9679 into L9719, L9720, L9721 and L9725 - the suspected robber trench of W9066.

Limits (N) Bounded on the N by L9719.

(S) Bounded on the S by L9720.

(E) Bounded on the E by W9066.

(W) Bounded on the West by the material below W9147.

Closed: Not closed, end of season.

Matrix: Sandy, semi-loose orange brown soil with many sherds and some bones, no shells.

Relations: L9679 covers L9725 and is of a different matrix (see card for L9679). L9725 is cut by pit L9720. If L9725 is a robber trench, it cuts W9066. If it is not, it reaches W9066. Further excavation in this area is needed in this area to determine this relationship and the relationship of L9725 and L9719 since these loci were not closed at the end of season. Large (30cm) field stones at the bottom of L9725 may not be the continuation of W9066 but rather the continuation of W9400 in SA A533, but further excavation is necessary in order to determine this. It is also not yet clear if the rubble extending NW from 9725 is really rubble, or a poorly preserved wall. It may not really belong with 9719. 9725 could be a robber trench in line with this rubble which ends and the S edge of 9066. Further excavation required.

W9925
↓

Additional Observations/Value: Possible robber trench of Iron Age wall; Low Value.
= 9720 = 9540 = 9532
