Summary _____

Opened: Brought TL9776 down to level of 1991 locus TL9694 to North; since material identical collapsed TL9776 with Southern end of TL9694, opened TL9807 to excavate material below, to TW9262 to North

Limits (N) Bounded by TW9262

(S) Bounded by TL9733

(E) Bounded by TW9728

(W) Bounded by TL9664 and TL9261

Closed: Brought TL9807 down to level of stone socle in TW9728 to East; closed TL9807 and opened TL9814 to excavate mudbrick debris below

Matrix: Dark-brown mudbrick debris, dry and crumbly at the edges due to weathering, more moist and dense near center; small amount of pottery; about 8 double- to triple-fist sized stones near Northwest end of locus, with no architectural context, probably tumbled from a nearby wall

Relation: TL9776 covers the Southern half of TL9807, but does not seal it. The Southern half of TL9694 covers the Northern half of TL9807, but does not seal it. TL9807 covers, but does not seal, TL9814 below.

To the North, TL9807 reaches TW9262, and is probably debris (at least in part) from TW9262.

To the South, TL9807 continues in mudbrick debris TL9733, and is probably identical to it.

To the East, TL9807 reaches TW9728, and is probably debris (partially) from TW9728.

To the West, TL9807 is cut by pit TL9664.

Additional Observations/Value: Since unsealed, of medium value.
