Summary

Opened: L9857 came down on W9887. L9857 split into W9887 with L9878 to the S and L9879 to the N.

Limits (N) L9879
(S) L9878 and L9930
(E) W9728
(W) 30cm portion between W9887 and L9300.

Closed: Wall removed. Collapsed along with L9879 and L9930 into L9953.

Matrix: Line of mudbricks (no individual bricks seen). In the center of the wall the mudbrick was dark grey and along both edges of the wall, the mudbrick was much more reddish in color (possibly a facing).

Relations:

L9857 covers but does not seal W9887.
 To the E: W9887 probably abuts the lower block of W9728.
 To the N: L9879 reaches the N. face of W9887.
 To the S: L9878 and L9930 both reach the S. face of W9887.
 F9879 continues under W9887. The wall appears to have been built on F9879. F9878 appeared to reach the S. face of W9887, though due to the degraded nature of both floor and wall, the relationship is tenuous.
 L9930 also continues under W9887 when it continues into F9879.

To the W. the wall ends before it reaches L9300. This area was excavated without a locus number to search for a continuation of F9879.

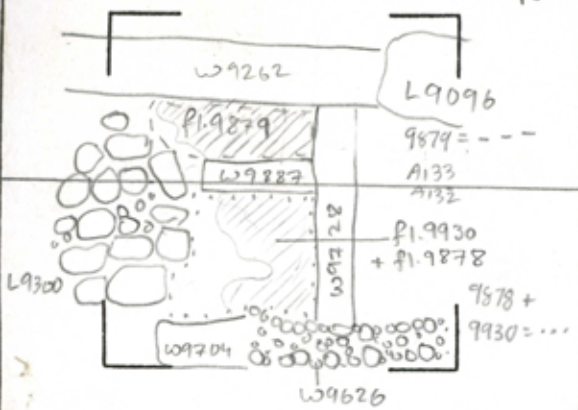

W9887 appears to be a thin mudbrick partition wall (similar to the tentative wall L9886 in A533) and related to a single surface to the N (F9879) and at least two to the S (F9930 and F9878 - and also possibly to F9857).

W9887 seals a portion of the N. half of L9953 below.

Additional Observations/Value: Mudbrick partition wall; Medium value; additional photos: 101617 to 101619; see also photos of F9878.
