Summary

Opened: AS FLOOR MAKEUP AND FILL BELOW: F9944.

Limits (N) W9282

(S) L9972

(E) UN-NUMBERED LOCUS BELOW L9932

(W) W9957

Closed: CAME DOWN ON FLOOR [F9962].

Matrix: F9944 WAS A PATCHY, THIN FLOOR OF CRUSHED KURKAR. FILL BELOW WAS EXTREMELY ASHY WITH CHARCOAL. ITS COLOR WAS DARK GREY TO BLACK. THIS MATRIX DIFFERS FROM THE REDDISH-BROWN SOIL WITH MUD BRICK DEBRIS AND SMALL CHARCOAL FLECKS OF L9944.

Relations: FL 9944 COVERS, BUT DOES NOT SEAL, [L9962] SINCE F9944 WAS PATCHY & NON-CONTINUOUS.

[F9962] REACHES W9957, AND IN FACT [F9962] CLOSURES UPWARD AND ONTO W9957, THIS INDICATES THAT BOTH FLOOR & FILL ARE LATER THAN THE WALL, AND AT SOME POINT IN TIME [F9962] AND THE WALL WERE IN USE AT THE SAME TIME. [F9962] ALSO REACHES PART OF W9957'S SPACE, INDICATING THAT W9957 HAD NO SOUTHWARD ROBBED TRENCH.

[F9962] APPROACHES W9282, BUT DOES NOT REACH IT. THIS APPROACH IS PATCHY AND FADED, SO THAT NO DISTINCT FOUNDATION TRENCH LINE IS VISIBLE FOR W9282. WE CAN ASSUME, HOWEVER, THAT SINCE W9282 WAS LAID ON TOP OF W9957 THAT [F9962] IS EARLIER THAN W9282. IT IS POSSIBLE THAT [F9962] MIGHT <sup>↑</sup> CON'T BENEATH W9282, <sup>↑</sup> ALTHOUGH WE DON'T SEE.

TO THE EAST OF [F9962] IS A SYSTEM OF FLOOR AND THEIR RESURFACINGS, COLLECTIVELY KNOWN AS "F9932." [F9962] IS PROBABLY PART OF THIS SYSTEM, & THIS CAN BE SAID TO "CONTINUE" INTO L9932.

TO THE SOUTH, FILL L9972 PROBABLY CUT [F9962], AS THIS FLOOR'S SOUTHERN OUTLINE IS PATCHY AND NON-CONTINUOUS, AS IF IT HAD BEEN DISTURBED. IT ALSO PROBABLY CUT [L9962].

[F9962] SEALS (unexcavated) & unnumbered locus below.

Additional Observations/Value: POTENTIALLY HIGH VALUE. FILL YIELDED SHEETS OF

IR1/JR2a
